Prime Series is made for everyday living.
Colors that always work.
Warm, soft, and easy to match with any style.

Nothing loud.
Nothing complicated.
Just clean, natural tones that make a home feel
right.

Prime Series.
Simple choices.
Beautiful spaces.

Most surfaces look good only on day one. After that the scratches show up. The stains stay. The grout lines make the whole room feel old and busy.

Surface that will never wear out

Peace of Mind

You want a surface that never makes you worry. A surface that can take heat. Take spills. Take daily use. Yet still look clean and calm every single day.

A woman with dark hair, wearing a vibrant red dress, is seen from the back, looking at a large, vertical, illuminated stone panel. The panel has a warm, yellowish-gold hue with intricate, organic patterns. The setting is a gallery with white walls and a ceiling with recessed lighting. In the background, there are columns and other stone panels, suggesting a museum or showroom environment.

The Prime Series advantage

Made through a full sintering process, the minerals are compacted under high pressure with a precision compactor and fired at extreme heat using *Italian SACMI Continua+ technology*.

This delivers a surface with unparalleled flatness and structural stability. The result is a dense, solid material that resists heat, scratches, and stains while keeping its strength and beauty for a lifetime.

Big format.
Big visual impact

Available in 240x120 at 9 mm. Fewer joints. Cleaner lines. A space that instantly feels wider and more premium.
