DAILY CARE

Routine cleaning keeps the surface looking fresh and refined. Use a soft microfiber cloth to remove dust, dirt, or light debris.

Steps:

- Moisten a microfiber cloth with warm water.
- Add a mild cleaning solution if needed.
- Gently wipe the surface evenly.
- Rinse with clean water.
- Dry using a clean soft cloth.

Regular care helps maintain the surface's appearance and performance over time.

DEEP CLEAN

For tougher stains such as coffee, ink, dye, or nail polish, a stronger cleaning solution may be required.

Use a recommended cleaning agent to break down the stain effectively.

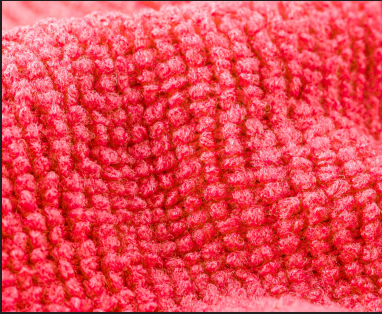

Important

Clean spills and stains as soon as possible.

Early cleaning prevents the stain from settling into the surface.

TIP: Always test the cleaning product on a small hidden area first to ensure compatibility. If the result is satisfactory, continue cleaning the rest of the surface. Use only recommended cleaning solutions. Avoid products that are not approved, as they may affect the surface finish.

CLEANING TOOLS

CLOTH

Use a microfiber cloth for everyday cleaning.

Apply a suitable cleaning solution to the stain and allow it to work briefly. Wipe the surface gently with the cloth.

Rinse with clean water and dry with a clean cloth.

SPONGE

A soft sponge can be used for stains that require more contact.

Apply the cleaning solution and allow it to penetrate the stain. Moisten the sponge with warm water and keep it damp. Clean the surface using gentle circular movements. Rinse with water and dry with a clean cloth.

BRUSH

For more stubborn dirt, use a brush with fine plastic bristles.

Apply the cleaning solution and allow it to react with the stain. Lightly scrub the area without applying excessive pressure. Rinse thoroughly with water and dry with a clean cloth.
